Professional Summary

B.Tech. Artificial Intelligence & Data Science student with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Experienced in developing and deploying full-stack applications using JavaScript, React.js, Node.js, Express.js, MongoDB, and Next.js. Strong interest in software engineering, backend development, problem solving, and building reliable user-focused applications.

Education

Dr. HN National College of Engineering
B.Tech. in Artificial Intelligence & Data Science
Christ Academy Junior College
De Sales Academy

2024 – 2028
CGPA: 9.05/10
CBSE XII – **85%**
ICSE X – **97%**

Technical Skills

Languages: Java, Python, C, JavaScript, SQL

Frontend: HTML5, CSS3, React.js, Next.js, Bootstrap, EJS

Backend: Node.js, Express.js, REST APIs, MVC

Databases: MongoDB, MongoDB Atlas, SQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Debugging, Problem Solving

Tools: Git, GitHub, VS Code, claude code, Vercel, Cloudinary, LocationIQ, Antigravity, Codex

Projects

EcoSort AI – AI-Powered Waste Management Platform

GitHub | Live

- Built and deployed a full-stack waste management platform combining AI waste classification, barcode scanning, recycling depot discovery, and doorstep pickup scheduling.
- Developed Next.js App Router route handlers for authentication, waste uploads, user profiles, scan history, and classification workflows using MongoDB Atlas and Mongoose.
- Implemented hyperlocal recycling maps using Leaflet, browser geolocation, OpenStreetMap Nominatim, and Haversine distance calculations; secured authentication with bcryptjs and HTTP-only JWT cookies.

TravelNest – Full-Stack Travel Marketplace

GitHub | Live

- Developed an Airbnb-inspired full-stack marketplace using Node.js, Express.js, MongoDB, and MVC architecture.
- Built REST APIs for listings, reviews, authentication, and user workflows, integrating Passport.js for authentication and session management.
- Integrated Cloudinary for image storage and LocationIQ for location-based functionality, supporting listing and media workflows.

TinyCut – URL Shortener

GitHub | Live

- Built a URL shortening service with unique short URLs and automatic redirection using Node.js, Express.js, and MongoDB.
- Designed REST APIs and MongoDB workflows for URL creation, retrieval, click analytics, and country-level visitor tracking.

Hackathons & Competitions

- Flipkart GRiD 8.0 – Round 2** – Advanced to Round 2 of the competitive technical challenge.
- Abode University Hackathon** – Participated in a competitive technical hackathon.

Achievements

- Solved **300+ DSA problems on LeetCode**, covering arrays, hashing, two pointers, sliding window, binary search, stacks, trees, graphs, and dynamic programming.
- Built and deployed three full-stack software projects independently;

Certifications

- ISRO Certified – Geodata and Analytics**
- AWS Certified Machine Learning – Developing Machine Learning Solutions**
- Microsoft Certified – AI and Prompt Engineering**
